

Code of Conduct and Store Standards

Document HR-CONDUCT-004 • Category: conduct • Effective 2025-01-01 • Applies to: all Kai Components store staff

1. Customer Service Standards

Every customer must be greeted within 30 seconds of entering the store. Associates are expected to offer knowledgeable help on component selection, compatibility, and safe handling, and to complete the transaction courteously.

2. Attendance

Reliable attendance is essential to store operations. Three no-call, no-show occurrences within a rolling 12-month period result in termination. Employees who cannot report for a scheduled shift must notify their manager at least 2 hours before the shift start.

3. Electrostatic Discharge (ESD) Handling

Bare boards, ICs, and static-sensitive components must be handled at an ESD-safe workstation using a grounded wrist strap. Damaged or mishandled static-sensitive stock must be quarantined and reported, not returned to sellable inventory.

4. Confidentiality and Fair Dealing

Employees must protect customer information and company pricing data, avoid conflicts of interest, and never manipulate sales records to inflate commission. Violations are subject to discipline up to and including termination.
